Summary

Full-stack software engineer with 2+ years building AI products for music rights, catalogues and the web. Ships end-to-end systems across React, TypeScript, Node.js and PostgreSQL, with production LLM pipelines, real-time voice and data-heavy platforms.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, C/C++, Dart
Frontend: React, Next.js, React Native, HTML/CSS, Tailwind CSS, Vite
Backend: Node.js, Express, NestJS, FastAPI, REST APIs, WebSockets, Socket.IO, SSE, WebRTC
Data: PostgreSQL, pgvector, Prisma, MySQL, MongoDB, Redis
AI: LLM pipelines, RAG, embeddings, tool use, prompt design, evals, PyTorch, scikit-learn, NumPy, Pandas
Music & rights: Royalty statements, cue sheets, catalogue metadata, ISRC/ISWC, MusicBrainz, DSP data
Platform: Docker, Azure, Linux, PM2, Git, GitHub Actions (CI/CD), Postman

Experience

Software Engineer — Dotted Eighth LLC, Visakhapatnam, India — Dec 2025 – Present

- Build two music-rights products: a royalty-intelligence platform (statement ingestion, cue-sheet checks, catalogue metadata, matching, valuation, permissions and white-label instances) and the Music AI suite over a 55,000-work classical catalogue.
- Shipped an embeddable React chat with SSE streaming, page-by-page sheet-music PDF analysis, and an AI data-quality butler that queues duplicate, missing-field and conflict findings for human review.
- Cut catalogue import time from about 68 minutes to 12 by reworking the ingestion pipeline; enrichment now runs across 15+ music and rights sources with entity resolution.

Stack: React, TypeScript, Express, Prisma, PostgreSQL, pgvector, MySQL, MongoDB, Redis, SSE, Socket.IO, Python, Azure, LLMs

Software Developer — Voice AI Buds — Nov 2024 – Oct 2025

- Built an AI companion platform for natural voice and chat, with near real-time voice processing and personalized responses.
- Designed NestJS microservices for 1,000+ concurrent users with WebRTC bidirectional audio and context-aware LLM pipelines; built the Next.js front end and optimized MongoDB schemas.

Stack: NestJS, Next.js, React, TypeScript, WebRTC, MongoDB, REST APIs, WebSockets

Software Engineer — Stealth Startup, remote — Oct 2024 – Mar 2025

- Built a production AI productivity platform for text generation, essay composition and image editing, using modular Node/Express services, a Next.js/React front end and a model abstraction layer over LLM and diffusion APIs.

Freelance Software Engineer — Independent, remote — Sep 2024 – Present

- Deliver AI-powered web, voice and productivity applications for startups and businesses, from prototype to production.

Software Developer — Aptask (JobTalk), remote — Dec 2023 – May 2024

- Engineered an end-to-end AI voice agent for recruitment automation, cutting screening time by 70% with LLM-driven multi-turn dialogue, intent recognition and entity extraction.
- Built the React/TypeScript front end and Node/Express back end with CSV candidate matching, WebSocket call monitoring and a 15+ KPI analytics dashboard.

Stack: React, TypeScript, Node.js, Express, REST APIs, WebSockets, LLMs

Projects

Cancer Biomarker Analysis App — Flutter, BTP under Dr. Siddharth Srivastava — Aug 2022 – Nov 2022

- Built a cross-platform app for biomarker gene selection, integrating OncoKB for FDA-approved pancreatic adenocarcinoma treatment recommendations.

Crowdsourced Participatory Medicine — design project under Dr. Mitali Mukerji — Jul 2021 – Jul 2022

- Led an 8-person team building a Heroku-deployed crowdsourcing platform; a Reddit crawler collected 1,000+ medical experiences and SciSpacy extracted biomedical entities.

Sentiment Analysis using NLP — ML course project under Dr. Yashaswi Verma — Dec 2020 – Feb 2021

- Implemented an IMDB review helpfulness pipeline with semantic feature engineering and ensembles (Naive Bayes, Random Forest, Logistic Regression), reaching 89.48% test accuracy.

Education

B.Tech in Bioengineering — IIT Jodhpur, CGPA 8.37/10, Department Rank 4 — 2019 – 2023
Coursework: Data Structures and Algorithms, Machine Learning, Deep Learning, Probability and Statistics, Linear Algebra.

Achievements

JEE 2019: top 1.5% of 1.3 million applicants. AP-EAMCET 2019: rank 626 of 185,711. JEE B.Arch 2019: rank 2,754 of 180,752.
