Education

Indian Institute of Technology Jodhpur — **July 2019 – May 2023**
Bachelor of Technology in Bioengineering, CGPA: 8.37/10 — *Jodhpur, India*

Sri Chaitanya Jr. College — **July 2017 – April 2019**
Class XIIth (BIEAP), Percentage: 97.0% — *Visakhapatnam, India*

K. V. Malkapuram, Visakhapatnam — **June 2009 – April 2017**
Class Xth (CBSE), CGPA: 10/10 — *Visakhapatnam, India*

Technical Skills

Languages: JavaScript, TypeScript, Python, C/C++, Dart, SQL
Frontend: React, Next.js, React Native, HTML/CSS, Tailwind CSS, Bootstrap
Backend & Database: Node.js, Express.js, NestJS, Django, MySQL, MongoDB, REST API, WebSockets, WebRTC
AI/ML & Data Science: PyTorch, Keras, Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn, SciSpacy, LLMs
Tools & DevOps: Git, Docker, Postman, Android Studio, Visual Studio Code, Google Suite, MS Office

Work Experience

Dotted Eighth LLC | Software Engineer — **December 2025 – Present**
- Building the **Music AI suite** over a 55,000-work classical catalogue: an embeddable React chat with SSE streaming, page-by-page sheet-music PDF analysis, and an AI data-quality butler that queues duplicate, missing-field and conflict findings for human review.
- **Tech Stack**: React, TypeScript, Express, Prisma, MySQL, MongoDB, Redis, SSE, Socket.IO, Python, Azure, LLMs

Voice AI Buds | Software Developer — **November 2025 – Present**
- Developing an AI companion platform for natural voice and chat interaction, with near real-time voice processing and personalized responses.
- Designing NestJS microservices for 1000+ concurrent users with WebRTC bidirectional audio streaming and context-aware LLM pipelines.
- Building a responsive Next.js frontend with real-time state management, optimized MongoDB schemas, and automated deployment pipelines.
- **Tech Stack**: NestJS, Next.js, React, TypeScript, WebRTC, MongoDB, REST API, WebSockets

Aptask - JobTalk | Software Developer — **December 2023 – May 2024**
- Engineered an end-to-end AI voice agent for recruitment automation, cutting screening time by 70% with LLM-driven multi-turn dialogue, intent recognition, and entity extraction.
- Built the React/TypeScript frontend and Node.js/Express backend: CSV candidate matching, WebSocket call monitoring, and an analytics dashboard tracking 15+ KPIs.
- **Tech Stack**: React, TypeScript, Node.js, Express.js, REST API, WebSockets, LLMs

Projects

Cancer Biomarker Analysis App | *Dr. Siddharth Srivastava, BTP* — **August 2022 – November 2022**
- Developed a cross-platform Flutter app for biomarker gene selection, integrating OncoKB for FDA-approved pancreatic adenocarcinoma treatment recommendations.
- **Tech Stack**: Flutter, Dart, C++, CMake, Android Studio

Sentiment Analysis using NLP | *Dr. Yashaswi Verma, ML Course Project* — **December 2020 – February 2021**
- Implemented an IMDB review helpfulness pipeline with semantic feature engineering and ensembles (Naive Bayes, Random Forest, Logistic Regression), reaching 89.48% test accuracy.

CrowdSourced Participatory Medicine Framework | *Dr. Mitali Mukerji, Design Project* — **July 2021 – July 2022**
- Led an 8-member team building a Heroku-deployed crowdsourcing platform, with a Reddit crawler collecting 1000+ medical experiences and SciSpacy NER for biomedical entity extraction.

Relevant Coursework

- Data Structures and Algorithms
- Introduction to Machine Learning
- Deep Learning
- Probability, Statistics and Stochastic process
- Linear Algebra

Achievements/Extracurriculars

- Department Rank 4 in Bioscience and Bioengineering
- Rank 626 of 1,85,711 in AP-EAMCET 2019
- Top 1.5% of 1.3 million JEE 2019 applicants
- Rank 2754 of 1,80,752 in JEE-B.Arch 2019
